

Aditi Dubey — Multi-File Interactive Portfolio

This version splits the portfolio code into three clean, separate files. This is the industry-standard way to manage web development projects, as it isolates structure (HTML), styling (CSS), and logic (JavaScript).

Recommended Directory Structure

To ensure the files connect correctly, place them all in the same folder on your computer:

```
my-portfolio/  
├── index.html  
├── style.css  
└── script.js
```

Step 1: HTML Document (index.html)

Create a file named `index.html` and paste the following code. This file structures the webpage, imports the FontAwesome icon library, and links directly to your new `style.css` and `script.js` files.

```

<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Aditi Dubey | Software Developer & Data Analyst Portfolio</title>

```

Step 3: Interactive JavaScript File (script.js)

Create a file named `script.js` and paste this code. This contains the functional logic for mobile menu toggle interaction, dynamic typewriter simulation, content sorting (category filters), scrolling nav link active trackers, and form interceptors.

```

// 1. MOBILE RESPONSIVE NAV MENU TOGGLER
const mobileMenuBtn = document.getElementById('mobile-menu-btn');
const navLinks = document.querySelector('.nav-links');
const navAnchorLinks = document.querySelectorAll('.nav-link');

mobileMenuBtn.addEventListener('click', () => {
  navLinks.classList.toggle('active');
  const icon = mobileMenuBtn.querySelector('i');
  if (navLinks.classList.contains('active')) {
    icon.className = 'fas fa-times';
  } else {
    icon.className = 'fas fa-bars';
  }
});

// Close mobile menu when clicking nav anchors
navAnchorLinks.forEach(link => {
  link.addEventListener('click', () => {
    navLinks.classList.remove('active');
    mobileMenuBtn.querySelector('i').className = 'fas fa-bars';
  });
});

// 2. THEME SWITCHER (Light / Dark Mode)
const themeToggle = document.getElementById('theme-toggle');

// Match user's local system preferences on startup
if (window.matchMedia && window.matchMedia('(prefers-color-scheme: dark)').matches) {
  document.body.classList.add('dark-theme');
  themeToggle.querySelector('i').className = 'fas fa-sun';
}

themeToggle.addEventListener('click', () => {
  document.body.classList.toggle('dark-theme');
  const icon = themeToggle.querySelector('i');
  if (document.body.classList.contains('dark-theme')) {
    icon.className = 'fas fa-sun';
  } else {
    icon.className = 'fas fa-moon';
  }
});

// 3. DYNAMIC TYPEWRITER EFFECT IN HERO LANDING
const wordsList = ["Software Developer", "Data Analyst", "IT Associate"];
let wordIndex = 0;
let charIndex = 0;
let isDeleting = false;
const typingElement = document.querySelector(".typing");

function playTypewriter() {
  const currentWord = wordsList[wordIndex];
  if (isDeleting) {
    charIndex--;
  } else {
    charIndex++;
  }

  typingElement.textContent = currentWord.substring(0, charIndex);

  let speed = 100;
  if (isDeleting) speed /= 2;

```

```

        if (!isDeleting && charIndex === currentWord.length) {
            speed = 2200; // Standstill on typed word
            isDeleting = true;
        } else if (isDeleting && charIndex === 0) {
            isDeleting = false;
            wordIndex = (wordIndex + 1) % wordsList.length;
            speed = 400; // Brief delay before typing next word
        }

        setTimeout(playTypewriter, speed);
    }

    document.addEventListener("DOMContentLoaded", () => {
        setTimeout(playTypewriter, 1000);
    });

    // 4. INTERACTIVE PORTFOLIO/PROJECT FILTER SYSTEM
    const filterButtons = document.querySelectorAll('.filter-btn');
    const projectCards = document.querySelectorAll('.project-card');

    filterButtons.forEach(btn => {
        btn.addEventListener('click', () => {
            // Toggle Active Button Classing
            filterButtons.forEach(b => b.classList.remove('active'));
            btn.classList.add('active');

            const filterTag = btn.getAttribute('data-filter');

            projectCards.forEach(card => {
                if (filterTag === 'all' || card.classList.contains(filterTag)) {
                    card.style.display = 'flex';
                    card.style.opacity = '0';
                    // Clean entry animation
                    setTimeout(() => {
                        card.style.opacity = '1';
                    }, 50);
                } else {
                    card.style.display = 'none';
                }
            });
        });
    });

    // 5. SMOOTH ACTIVE NAVIGATION LINK HIGHLIGHTING
    const sections = document.querySelectorAll('section');

    window.addEventListener('scroll', () => {
        let currentSec = '';
        sections.forEach(sec => {
            const secTop = sec.offsetTop;
            const secHeight = sec.clientHeight;
            if (window.pageYOffset >= (secTop - 180)) {
                currentSec = sec.getAttribute('id');
            }
        });

        navAnchorLinks.forEach(link => {
            link.classList.remove('active');
            if (link.getAttribute('href').slice(1) === currentSec) {
                link.classList.add('active');
            }
        });
    });

```

```
    }  
  });  
});
```

```
// 6. CONTACT FORM SUBMISSION INTERCEPT
```

```
const contactForm = document.getElementById('contact-form');  
contactForm.addEventListener('submit', (event) => {  
  event.preventDefault();  
  const senderName = document.getElementById('name').value;  
  alert(`Thanks, ${senderName}! Your message was successfully sent (mockup submit). I will get back to you shortly.`);  
  contactForm.reset();  
});
```
